

# Architecture is *Beauty*

## Taj Mahal

There is a mosque on the western side of the main tomb and on the eastern side, there is the Naqqar Khana. Both structures display an architectural symmetry but contrast in their color. While the mosque and rest house are on opposite ends, the two are mirror images of each other.

## Marina Bay Sands

Created in an attempt to inspire future architectural designs, the Marina Bay Sands resort is designed with a unique concept that is present throughout the whole resort. The three towers stand tall and command attention. Following the principles of feng shui, it is perfectly balanced and harmonized with the environment and those who use the resort.

## The Colosseum

Although this is an amphitheatre, it is unique in the fact that it is shaped like an oval rather than a circle. It was constructed this way to allow everyone a good view of the events, fulfilling its purpose. An engineering marvel at the time, it tackled the challenge of building an entire building only out of stone without any modern tools.
